

General Implementation

an auto blocker when someone says a blacklisted word

Tr45

application immediately closes twitter when a blacklisted word is loaded

Tr45

application hides away the tweet with blacklisted word

Tr45

Hurdles

possible issues intergrating with twitter

Tr45

constant twitter updates could cause application to break needing constant fixes

Tr45

support lifetime would have to follow user usage

Tr45

could also block accounts that display ads with blacklisted text

Tr45

Might be a “one trick pony” in usage

Tr45

Could accidentally hide content speaking against blacklisted words/phrases

Tr45

could accidentally block users you are following

Tr45

Bare Bones

Needs to at least be able to log accounts using blacklisted words

Tr45

Implementation method

web-based add-on

Tr45

“plug and play” download and it works

Tr45

Profit

Possible premium implementation for profit
